G O L F

IN A SPORT WITH UNIQUE LIGHT REQUIREMENTS,

—— **THE REVO LENS PALETTE** ——

has numerous offerings for golfers to **IMPROVE CONTRAST & VISUAL ACUITY** while also highlighting **key parts** of **THE LIGHT SPECTRUM** FOR A MORE **PRECISE VISUAL EXPERIENCE ON THE COURSE.**

**REVO | Technology**

Performance + Protection: Lenses are based on NASA technology and represent the best in performance mirror coatings.

**REVO | Variety**

A great leisure lens in a variety of stunning mirrors including Blue Water, Graphite, Solar Orange, Terra, Green Water and Open Road.

**REVO | Social Purpose**

Through the Buy Vision, Give Sight partnership with Bono, \$10 from every Revo frame is donated to those fighting for their sight.

## H<sub>2</sub>O BLUE

The H2O lens provides unmatched contrast enhancement and color-popping spectral performance with its low hue signature blue mirror

96%

Blue Light & HEV Light Protection

81%

Absorbs Visible Light

## GRAPHITE

Enhances natural vibrant colors while blocking harmful rays and harsh glare

91%

Blue Light & HEV Light Protection

87%

Absorbs Visible Light

## SOLAR ORANGE

High-intensity, iridescent and visually-stunning multilayer mirror coating that enhances surrounding terrain by highlighting the upper end of mid-range light

94%

Blue Light & HEV Light Protection

84%

Absorbs Visible Light

## BLUE WATER

Our classic blue mirror coating - perfect for cutting glare in bright conditions on the water

94%

Blue Light & HEV Light Protection

89%

Absorbs Visible Light

## GREEN WATER

Enables natural colors to pop and radiate by completely cutting through surface glare in medium and low-light conditions

96%

Blue Light & HEV Light Protection

87%

Absorbs Visible Light

## STEALTH

Reduces internal reflection and provides even management of light across the entire visible light spectrum to create an unmatched visual experience for the wearer

90%

Blue Light & HEV Light Protection

85%

Absorbs Visible Light

## CHAMPAGNE

The Champagne lens is a subtle pearlescent color that is appealing to the eye while delivering a soothing visual performance with a spectacular incandescent effect

95%

Blue Light & HEV Light Protection

86%

Absorbs Visible Light

## OPEN ROAD

Image intensifier filters improve light adaptation whether in bright or low light situations while also precision-tuning light transmission for greater sharpness, crispness and contrast

95%

Blue Light & HEV Light Protection

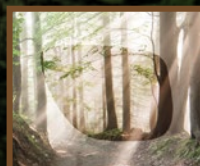

83%

Absorbs Visible Light

## TERRA

Actively filters the light spectrum to provide clear vision from trailhead to viewpoint

95%

Blue Light & HEV Light Protection

85%

Absorbs Visible Light
